## Troubleshooting

### What channel does my TV need to be on for SkyBest TV to work?

Channel 3 or 4. This will be determined by what is selected in the hardware settings of the set-top box (STB). (Many newer TVs have dedicated inputs that are not dependent on the TV channel.)

### I am unable to see all channels in the guide.

You might have the guide on the Subscribed, HD or Favorites list instead of the All List. Press Guide until you see ALL appear in the left corner of the guide. Or, you may need to check your parental controls. It is possible that certain channels are blocked and will not show up in the guide.

### My remote isn't working properly.

Check your batteries. If they work, make sure the STB device is activated. To activate the STB device, simply push the STB button. Your STB button should turn red when other buttons are pushed.

### There is no signal on the TV, the picture is snowy or the TV picture has blocks or is tiling:

Unplug the power cord from the back of the STB for five seconds. Plug the power cord back up and wait for the STB to reboot. This should restore proper service.

### Set-Top Box (STB)

Never stack any other equipment on top of your STB. If the STB gets too hot, it may stop working properly.
